

Job Description

Junior Web Developer

2020

The Junior Web Developer role focuses on using the person's experience and skills to provide high quality service to clients, while working with onsite customers.

This position is ideal for a tertiary education student (or just finished) with an interest in Web Development. This job will give you the opportunity to further your skills through self-paced learning and small client projects. This position is a good stepping stone for anyone interested in moving into Web Development after university.

Required Knowledge

- Understanding of Databases (MySQL is preferable but not necessary)
- Knowledge of HTML and CSS
